

PUBLIC SCHOOL PROMOTIONS AND NEW COURSE OF STUDIES

The following is by way of explanation to the parents of children attending the elementary and intermediate schools regarding promotions and will no doubt be appreciated.

Under the new set-up, the school is divided into three distinct sections, viz.: the elementary school (grades 1 to 6, as we have known them), the intermediate school (grades 7, 8 and 9), and the high school (grades 10, 11, and 12).

Strictly speaking, in the elementary school there are no grades. There are, however, two divisions—division 1 and division 2. Each of these divisions constitutes three years work for the average child and while some might do the work required in less than three, others might take longer. A division therefore, has an "A" year, a "B" year and a "C" year, and it is only pupils in the "C" year who are eligible for promotion to the next division, having fulfilled certain very definite requirements, particularly in the subjects called the "basics".

Only the names of those passing out of a division, and in the intermediate school grades 7 and 8 appear below. Other pupils have not been informed of the work accomplished during the year by the report card.

Promotions from div. 1 to div. 2: Kathleen Armstrong, Teddy Barnett, Donald Branchflower, Annie Callan (on trial), William Carrell, Addie Coleman, Doreen Courrier, Douglas Daugherty, Rose Dreweick, Duane Gaudet, Roy Hartling (on trial), Shirley McKemie, Douglas Murray.

Students Farewell School Principal

The students of the Wainwright high school and their friends gathered in the Masonic hall on Wednesday evening to farewell their principal, Mr. H. P. Thorsen. The evening was spent in dancing, Beatty Wallace's new orchestra supplying the music.

Following the lunch hour the presentation of a beautiful part scene was made to Mr. Thorsen by Brock Armstrong, president of the Student Union, who voiced the regret of the student body because of his departure and hoped that he would find pleasant association and happiness in his new field of labor. Following a reply by Mr. Thorsen, all joined hands and sang Auld Lang Syne.

NATIVE DAUGHTER WEDS IN STATES

The marriage of Miss Jean Rosholt of Oconomowoc, daughter of Mr. and Mrs. George Rosholt of Chicago, to James Higgins, son of

Newsreel Presents The Coronation

Every brilliant angle of the Coronation, shown in actual motion pictures, makes a tremendous feature of the current issue of the Universal Newsreel.

The Archbishop of Canterbury is actually to be seen as he reverently places a crown of purest gold upon the youthful head of King George VI. The whole impressive rites at Westminster Abbey is captured by the cameras.

London is to be seen jammed with humanity for the world's greatest pageant. Millions line the route of the Royal procession as the King and Queen pass by in a gilded Coach of State that was built a century and a half ago. The members of the Royal Family receive a tremendous ovation in a fervent burst of national enthusiasm.

Glittering uniforms garb thousands of troops, and foreign envoys in their Court regalia form a dazzling section of the parade. Premiers from the far-flung Dominions of the Empire attend the ceremonies, with British Peers in their traditional robes of State.

Universal Newsreel presents the whole tremendous spectacle which will be showing at the Elite theatre in the very near future.

Celebration Was Worthy Successor to Former Years

Big Crowd at Fair Grounds for Dominion Day Gathering

Parade, Sports, Band, School Kiddies, Show and Dance All Attracted Good Following Thursday

Promptly to the dot led by Marshal Charlie Horn in his "Harley Davidson Special" the Dominion Day parade started off the day's proceedings on Thursday last with the Weather Man doing his level best to scorch things up and the pleasant breeze vying with him to keep the temperature at least bearable.

Hundreds of the school children in marshal array, each section headed by their flags and banners, were followed to the Fair Grounds by a whole string of decorated cars, floats, and what have you, all adding their quota to make the 1937 celebration a worthy successor to the many Wainwright has undertaken.

MAYOR WELCOMES CROWD

The crowd, welcomed by the Mayor at the platform in the grounds, joined heartily in the singing of the National Anthem, and other patriotic airs with the band giving splendid accompaniment, and listened while His Worship spoke, in part, as follows:

"Hardly has the echo of that joyful occasion of the Coronation celebration faded away when, as today once more, we are called together for another festive occasion. This time it is of national significance, not to the whole Empire, but to Canada alone, for we today celebrate our anniversary as a Dominion."

"We are not holding this assemblage to celebrate the founding or discovery of Canada—that happened

Snappy Ball Seen all Day

Under the able management of Bill Stuart and Doc Springbett, the hard- and soft-ball teams to the total of over a dozen in all, put up a splendid day's sport, and the fans were given every bit of the games full support. The diamonds were a real center of attraction right through until the finals were played in the fast-gathering twilight.

In the first senior games the Amiak boys doubled the score on the Irma team leaving the card 2-1, with Wainwright team piling up a 14-0 victory over the boys from Auklandale.

The final senior game saw the home team working hard all through the nine innings to emerge victorious with a 10-4 score.

Five teams were entered in the junior hard-ball contest, and of these the boys from Hardisty drew the bye, following which the locals lost out to the aggregation from Car to the tune of 22-5, Irma lost to Ribstone 2-0. At bat again in the semi-finals Car players made it nine to Hardisty's three, but in the closing game of this series the Irma team played some real snappy ball to make the final reading 6-2 in their favor.

The merry-go-round sure received full patronage from both young and old, and the doll game and the big stand, etc., were seldom unattended despite the conditions. Folks were truly "out for a good time" and apparently they got it on Thursday.

Quite pleasing was the big band and its latest hit tunes both on the side and in the stand at the biggo. The little lady from Chauvin, too, blows a pleasing addition in the trumpet section; and looked real chic in her uniform to conform with the rest of the boys.

It was an unfortunate occurrence when the little Myers girl, feeling sick on the round-a-bout, attempted to leave her device and slipped to the ground. She was taken to the hospital and happily was found little worse for her fall. Too many lollipops, possibly!

HEAD APPOINTED TO NEW TRANS-CANADA AIR LINES

MONTREAL, Que.—S. J. Hungerford, President of Trans-Canada Air Lines, has announced the appointment of Philip G. Johnson as vice-president in charge of operations of the new airways system. An executive with international reputation, who has organized during the past two years several of the principal air transport services in the United States, including the United Airlines, Mr. Johnson was asked to give the new Canadian airways project the benefit of his experience by undertaking the creation of the complete organization for operation.

The special meeting was presided over by S. J. Hungerford, chairman and president of the Canadian National Railways, who is also president of the new air corporation. The other directors are: James V. Murdoch, of Toronto; Hon. Wilfred Gagnon, Montreal; H. J. Symington, Montreal; and three provisional directors nominated by the Dominion government: Commander C. P. Edwards, chief of air service, department of transport; J. A. Wilson, controller of civil aviation, department of transport; and G. Herring, chief Superintendent of air and land mail services, Post Office department.

An official statement of the directors said: "Since the Act to incorporate the enterprise was given Royal assent on April 10th last, the Board of Directors of Trans-Canada Air Lines, in conjunction with the Hon. C. D. Howe, minister of transport has been engaged in formulating plans for the new service. Seven planes of the latest type, suitable for carrying mail and express and eventually passengers, are being constructed and three of these will be delivered during the present summer. The training of Canadian pilots in instrument and radio range flying is being provided for and will proceed through the next few months. Before scheduled flights are begun, communication radio ground stations have to be established and manned by operators trained as radio catchers. Route lighting, emergency field lighting, air-port lighting, hangar accommodation, weather reporting, etc., have also to be provided. All of this work is now being rushed to completion.

"Radio range flying—flying on the beam—is a development of the last few years in the United States and has not been used here except in the service between Montreal and New York. For a trans-Canada air service instrument flying is essential and it was considered necessary to see to it that the service was well equipped from the start."

(Continued on Page Four)

Softball League Sees Opener Game

In the opening game of the Wainwright Community Softball League, played in town Monday night, the Wainwright High School won out over Wainwright Pats by a score of 18-11. Both teams are showing more class in their style of play, and pitchers Bill Cowley and Nordstrom turned in good performances on the mound, some of the batters not taking to their offerings with any results. The Pats fielded a few new players in the persons of John Nelson, Gene Torgy and Cliff McGill, and this team looks like a contender as the schedule is run off.

The game by innings:
Wain. Pats. 1 0 5 3 0 1 0 0 11
High School. 2 9 0 1 4 0 1 1 11

CROPS DAMAGED BY INTENSE HEAT

General—While the stand of wheat in Manitoba is heavy and even, says the crop report of the Bank of Montreal, continued dry weather has caused serious damage to crops over wide areas in Saskatchewan and parts of Alberta. Moisture in these areas has not been sufficient to promote satisfactory growth, and heavy general rains are required immediately to check further deterioration. In southern Saskatchewan irreparable losses have already occurred. In Ontario growth has been rapid and crops generally are in better than average condition. In British Columbia a spell of warmer weather has followed heavy rains, and the prospect of satisfactory yields is more promising.

Archer-Challenger Nuptials Celebrated

Under an archway of roses and wedding bells a pretty wedding was solemnized at the home of A. E. Challenger at Edgerton, Alberta, when their only daughter, Jean Evelyn, became the bride of Calvin D. Archer, eldest son of Mr. and Mrs. O. L. Archer of Chauvin, Alberta. The Rev. Armstrong of Wainwright, officiated.

The charming bride was attired in a French gown of white silk net, and veil with wreath of orange blossoms. She carried a bouquet of opheelia roses. The bridesmaid, Miss Arlene Archer, was daintily attired in a pale blue silk net gown, and carried a bouquet of roses and sweet peas. Mr. G. Mitchell of Edgerton, acted as best-man.

After the ceremony a buffet luncheon was served to about sixty guests, including relatives and friends from Chauvin, Edgerton, Lloydminster, Edmonton, Calgary, Spokane, Washington, and Salt Lake City, Utah.

The bride and groom were the recipients of many beautiful and useful gifts.

The happy couple left for Edmonton on their honeymoon.

New Airways Head

Mr. P. G. Johnson, who will undertake operations of the new system of Trans-Canada Air Lines.

Prize Awards

The awards for prizes, which were in the capable hands of Mrs. J. Pawling, Mrs. J. G. Middlemas and Mrs. J. Welch, were announced from the platform at the close of the speaking as follows:

Decorated cars—Mrs. W. Huntingford, 1; Mrs. H. Brunner, 2. "Plots—Armstrong's Ltd. "The old river boat," 1; Rudi & Patterson, 2. In the awards for the younger folk E. Erickson and J. Carlyle won first money with their representation of "Cowgirl and cowboy," while the cartilage and dog team outfit "On the Ekklino Trail" arranged by J. Rutherford and R. Lilly came next in judging. The "Bring 'em back alive" exhibit by L. Greer, with his caged roaring lion took third money.

Packed early in the evening crowds packed the theatre to enjoy the feature film shown there, and following the show literally hundreds were dancing to the pleasing strains of the Springbett orchestra until, almost daylight, on the coming day.

The Bruce-Robinson Electric Ltd. demonstration car from Edmonton, which was in charge of Messrs. A. McMullen and P. Phelps attracted

THANK YOU !!

And finally we are asked to pass along to all and sundry the hearty thanks of the whole committee responsible for the day for all the assistance which they received in any way towards making the final outcome so successful as the celebration proved to be.

Although very painful at the time, we are glad to learn that the ball player from Car who was struck by a ball and suffered a broken collar-bone is now progressing nicely.

Even the little shower which fell in the early evening was welcomed. Although not of long duration, it cooled the air nicely!

An Invitation

TO ALL FARMERS IN THE DISTRICT
EDMONTON EXHIBITION JULY 12-17

If you are contemplating visiting the Exhibition, the Massey-Harris Co. cordially invite you to make their office and show room your headquarters while in the city and will try and make your visit as enjoyable one. TODAY & TOMORROW

by
Frank Parker
Stochbridge

CLIPPERS

I saw a miracle the other day. At

least, I saw most miraculous to me to

watch one of the great Pan-American

clippers come into port at Miami

after a 7000-mile flight from Buenos

Aires. At first a tiny speck in the

southeast sky, like a distant bird,

then gradually growing larger until

one could hear the whine of its four

great engines, as it circled over the

edge of the shore to come down,

head-to-wind, on the waters of Biscayne Bay.

In and out of this, the world's

largest international airport, 142

giant flying boats carry passengers

to and from every part of Latin

America. Three quarters of a million

passengers have been flown over

three hundred million miles without

a single mishap. The same company

operates the trans-Pacific fleet of

flying clippers and I saw the first

of the new ships which will run on

the new trans-Atlantic service.

All these international flights are

over water and they do so night flying.

One can get to Chile in five days

where steamers take a month!

That's a miracle.

SILKORSKY air travel

Back in 1913 a young Russian,

Igor Silkorsky, got the idea of building

a bigger and better airplane

than has ever been made. Nobody

had any planes then which could

carry important weight or be relied

upon for more than a few miles.

Silkorsky built a huge plane which

flew over Moscow with 72 passengers.

The World War set everybody to

building speedy but dangerous military

planes. Silkorsky kept his faith

in his commercial plane. He came

to America after the war and is

now the foremost designer of huge

flying boats. All of the "Clippers"

came out of his Bridgeport workshop.

The newest one, now building,

will be 180 feet across the wings

and will carry sixty passengers,

two or three tons of freight

and a ton or more of mail at 200

miles an hour, with gas enough to

cover 2100 miles or more without

refueling.

JUNK

The most active of all the world's

markets is the trade in junk. Scrap

iron and steel is in greater demand

than ever before and at higher prices.

In the course of the past few

weeks I have had occasion to visit

a dozen or so of the important Atlantic

seaports from New York all the way

down to Miami. At every port I have

seen huge piles of scrap metal and

building steel and every other imaginable

form of junk, piled up on the

wharves, waiting for ships to

take it to Europe and Japan. I saw

five ships in one day loading scrap at

Delaware River ports.

The world's scrap metal trade is

responsible. Modern steel manufacture

requires a high percentage of scrap

to make the mixture right. England,

Germany, Italy, France and Japan

are building warships and making

guns so fast they have to import

scrap from America.

"More stuff for Japan to make

guns to shoot us with" is an expression

I have heard in almost every port.

I have no especial fear of Japan,

but I am afraid the world is heading

for another great war and that we

will have trouble keeping out.

SHARECROPPERS big profits

It is easy to generalize about the

pitiful plight of the southern share-

cropper, but any generalization is apt

to be shot full of holes by the facts.

Doubtless many sharecroppers are

in distress, but I met one the other

day on the shore of Lake Okechobee

who was not complaining.

This young farmer rented 40

acres of land on shares last winter to

grow string beans. He agreed to pay

the owner of the land one-quarter of

whatever he got for his crop. Late in

May he sent the last of his beans to

market. He walked into the owner's

office and gave him a check for \$1600.

He had sold his crop from 40 acres

for \$6,400. Another tenant farmer

renting from the same owner, made

Canadian Garden Service

One day in July is enough for

memory to be enriched forever if

only with the sight of flowers as

seen in contrast with their natural

surroundings of water, grass, foliage

and sky.

Everything, whatever, of beauty

lies at its best by virtue of contrast-

ing, surrounding. A precious gem is

seen to perfection only in its setting.

At this season of the year a most

restful lull in nature appears to

take place. Even the hills lie waiting

to receive the new waves of the clouds

that slip, like birds, from shoulder

to shoulder. These clouds, like every-

thing else have a great richness

this month, as proudly filled with

white light that they quiver with

intensity, throwing paths of ghostly

radiance on the water that is blue,

here and there ruffled darkly like

tarnished silver—a perfection of

contrast, superbly exquisite!

The woods are in their prime, but

before the end of the month—alas!

there will be signs that Nature is on

the wane. Several of the spring plants

that had struggled after blossoming

soon wither under the influence of a

hot sunbath; but not so the fortunate

ones which bloom later and are

borne in marvellous places, ponds

and streams.

One of the most conspicuously

beautiful of native water-plants is

the pickered weed, so-called because

it is said—that pickers lay their

eggs among the leaves. It is found

growing from Nova Scotia to Ontario

in mud, in the shallows of still

waters. The bright beauty of the

spikes of blue, ragged flowers, seen

at a distance will, perhaps, suggest

thickets of clover, but close acquaintance,

however, will soon reveal the difference.

Another lover of damp places is

the gorgeous purple loosestrife, of

European origin, with its brilliant

spikes of large magenta flowers. A

very attractive and beautiful plant

as well as most interesting, because

through Darwin's study it has assumed

an important place in his

theoretical origin of species.

In July, cultivated plant life is in its zenith or at the peak of perfection. But here again the galaxy of bloom is seen at its best only by virtue of contrasting surroundings whether they be well-kept grass, fence, wall or hedge.

There is much to be seen and marvelled at in the introduction of choice varieties of flowers, especially when seen against a suitable background or framework.

At the Central Experimental Farm, Ottawa, there is the famous collection of hedges. Many species of trees, both deciduous and evergreen, also shrubs have been trained and clipped into rows after row of infinitely trim hedges. Great forest trees such as the pine, hemlock, larch, spruce, oak, beech, birch, elm and hornbeam are apparently all quite contented to become hedges in their merciful adjustment, which Nature makes when what cannot be cured must be endured.

Flowering shrubs are flourishing in the form of lilac, dogwood, viburnum, caragana, apricot, ninebark, currant, honeysuckle, and hydrangea, so are fruit trees, for the mature berry is also forced to bow to the toper's art. A veritable example of perfection in horticultural craftsmanship; some of them ten feet high—the result of many years' perseverance in the quest of a noble and living tribute to toper.

CRUDE OIL PRICES
CONTROL GASOLINE

Prices are the chief things by which the public knows the oil industry and they are the least understood perhaps, even by oil men themselves.

Prices have been the cause, or have been used as the chief cause of legislative and legal investigations of the oil industry, and of suits against and within the industry. No other industry has had its prices and methods and family rows so well ventilated in investigations and court actions as the oil industry.

Strange as it may seem to those who may be the chief critics of the industry, oil prices from the well to the consumer, are fixed almost wholly by one factor, namely, competition just as they are in practically every other business under the sun. There are, of course, other factors which have varying influences on price fluctuations.

But the fact remains that people in Canada and the United States are fortunate in being able to purchase their oil fuel at figures lower than any other part of the world. Auto travel is cheaper because of cheap gasoline. At a time for instance when gasoline was 17.9 cents per United States gallon in Minneapolis it was 21.4 cents in Paris, 53 cents in Berlin, 31 cents in London, England, where volume is many times any Canadian centre, 47 cents in Warsaw, and 17 1/2 cents plus tax in Montreal. All prices are governed by the world price of crude oil.

BIRDS & BUGS

The wholesale slaughter of certain species of birds is deplorable, when one considers the important part they play in keeping insect pests in check. Naturalists who adhere to statistics tell us that one family of nuthatches, during the breeding season, consumed 24,000 insects and larvae, besides an enormous number of insect eggs. It has been estimated that a fledgling, in the first month of his life, will eat twelve times its own weight of insects. This becomes more significant when we learn that a young caterpillar, in the same space of time, will devour 40,000 times its own weight of food! Were there no birds, insects would quickly gain the upper hand, despite all man's efforts to control them with nicotine sulphate and lead arsenate.

HARVESTING SEED OR CRESTED WHEAT GRASS

Crested wheat grass for seed production is grown in rows, usually three feet apart, to give greater length for harvesting and insure a better set of seed, particularly under dry conditions. The time of harvesting is most important. If allowed to become too ripe, as much as three-quarters of the best seed can be lost when harvesting. It is usually ready to cut when the heads are well turned but the stems are still green. A good guide is to press a kernel endwise between the thumb and forefinger. The seed is ready to cut when the kernels buckle rather than break or flatten out in this simple test. The time of cutting is the latter part of July or early August.

Because of shattering when ripe, a combine is unsatisfactory. The grain binder is suitable for harvesting the average row crop of crested wheat grass. A smooth rather than a sickle knife should be used. When the crop is abnormally heavy and bends over, special guards may be used to pick up drooping heads. If the crop is too short to permit tying in small bales, a special box as used for a short grain crop, will be necessary. Considerable seed can usually be saved by spreading a canvas on the combine carrier. It is also advisable to have the sheaves lifted off the combine carrier rather than dumped. Another consideration to avoid excessive shattering, is to cut crested wheat grass in the early morning rather than in the hot part of the day.

Stooking of sheaves should be done immediately after binding. Long narrow stooks running north and south are advisable. Eight or ten sheaves makes a convenient size stook. The stooks should be capped if some form of stook cover is not available to prevent loss from rain or hail. This crop should be threshed as soon as possible after curing which takes about ten days of fine warm weather. Too much care cannot be exercised in harvesting crested wheat grass if the grower desires to save all possible seed.

U.S. AUTHORITIES AT EXPERIMENTAL FARM

A party of thirty-five or forty of the most prominent live-stock breeders of United States will visit the Dominion Experimental Station, Lacombe, for the Shorthorn Field Day on Monday, July 12th. Among these are several brilliant speakers, and addresses will be given by Professor C. W. Hickman, Professor of Animal Husbandry, University of Idaho, and by Professor H. C. Hackadorn, Professor of Animal Husbandry at Washington State College. Brief addresses will be given by some of our most prominent Canadian breeders of Shorthorns.

The Experimental Station herd of Shorthorns comprises about forty-five head. Animals will be selected for several judging classes when expert judges of the breed will place the animals and give demonstrations on proper breed type and character.

Nancy Hart's HOME NEWS

Wooden spoons are preferable for stirring no matter what kind of food you may use. The wood does not scratch or mar a metal or glazed surface and it is much quieter.

Mixing bowls and spoons suggest good things to eat. So here's a recipe for tasty cookies that will be just right for the picnic basket.

Chocolate Drop Cookies
One-half cup butter, 1 cup brown sugar, 1 egg, 2 squares chocolate, ½ cup sweet milk, ½ cup flour, ½ teaspoon soda, ½ teaspoon salt, ½ teaspoon vanilla, ½ to 1 cup nuts (pecans or walnuts).

Cream butter and sugar. Melt chocolate over hot water and add to first mixture. Stir in part of flour. Add milk. Mix thoroughly. Mix and stir remaining flour with salt and soda. Add to mixture. Mix lightly and add egg. Mix until blended and drop from teaspoon on to an oiled and floured cookie sheet. Bake fifteen minutes in a moderate oven (375 degrees F.).

When washing blankets or any kind of woolen garments watch the temperature of the water. It's easy to prevent shrinkage if comfortably warm water is used for both washing and rinsing. Wring blankets as dry as possible by squeezing and pressing, never twisting. Squeeze all knitted woollens as dry as you can and then put them between bath towels and roll tightly. Spread on a flat surface and pull into shape. Shake blankets frequently as they dry to fluff up the fibers.

Add 1 tablespoon grated cheese to 4 eggs the next time you make scrambled eggs.

After cooking onions or fish heat a few tablespoons of vinegar in the frying pan. This will remove the odor of the food and you can wash the steels in the usual way.

Saturday: I aint doing none 2 well in school and Pa got after me about it. He sed he didnt think no thing of studyen several hrs. at night when he went to school. & I dont neither I repulse and sed.

The World of Wheat

By

H. G. L. Strangre,
Director, Research Department,
Searle Grain Company, Ltd.

Gold is: once again a matter of grave concern to statesmen.

When the prices of all commodities fell precipitously in 1929, many governments, against the advice of the best economists, revalued gold, suspended gold payments, and printed large quantities of paper money in order to make commodity prices rise.

The desired effect was achieved, but economists warned the Governments that in consequence the production of gold would become greatly expanded, and that commodity prices and the cost of living would certainly rise to high levels.

Governments are now fearful that these forecasts are coming true, and so they are talking of reducing the production of gold, and of making it worth less money, so as to reduce in turn the prices of all products, and so of the cost of living.

If this is done, however many people, who are not in particular, will certainly be seriously harmed.

The wiser plan it would seem, would be for Governments not to

tamper with gold again, but to redistribute it to the nations that urgently need it, and particularly to remove the present harsh restrictions against trade so that an abundance of foods and products may be made available to all the people. Then all the gold will be needed to support the increased world trade.

Following factors have tended to raise price:—Rust affecting northern U.S. winter wheat area and present in spring wheat area—Wheat believed beyond resurrection in large

area of Western Canada—Fear of too much moisture in U.S. winter wheat for European blending purposes—Germany purchases considerable quantity of Argentine corn—South African prune crop is a failure.

Following factors have tended to lower price:—U.S. wheat offered in Europe at attractive prices—Broom-corn harvests Russia likely to export wheat and barley this summer—U.S. winter wheat harvest again progressing—Light rains received in the Argentine—Most European crop conditions improve.

Look out for poison ivy with its lance-head leaves, three in a group, growing vigorously over blighted trunks of trees, upon old fences and in neglected places. It is easy to know and avoid, if one tries. Vigorous scrubbing with plenty of soapy water will sometimes ward off or lessen an attack after one has come in contact with the plant. Bear in mind that this is an acid poison and it takes "alkalis" to neutralize acids.

My best success with ivy poisoning has been with equal parts of grain alcohol and lime-water. The alcohol, with its affinity for water, rapidly causes the inflamed skin, and the lime-water counteracts the acid. Apply by cloths soaked in the solution until the trouble is corrected. Calamine lotion, which can be prepared by your local druggist, is also successful in many cases.

Never treat poison ivy with ointments or "salves"; they simply hold the poison in the tissue. Sugar of lead ointment is especially dangerous because of lead poisoning. If you are extremely sensitive to ivy poisoning, consult your physician on the advisability of the immunizing process or antivenom.

He says the only reason he watches his animals is to find out what they're up to and what they're going to do next.

Beatty says no trainer has ever actually stuck his head in a lion's mouth. It just looks that way. He says: "I've known some pretty reckless animal trainers, but I've never heard of one crazy enough to stick his head into the mouth of a lion." Besides lions have halitosis, so had that even their best friends would have to wear gasmasks.

There's another popular idea—that lion-trainers use red-hot iron to control enraged animals. But Beatty says that if you want to commit suicide, just enter the cage of a lion or tiger that has been burned with a red-hot poker. His harmless weapons are a kitchen chain, a whip and a revolver filled with blank cartridges.

Clyde Beatty says he's tried working with tame animals—animals born in captivity, and he prefers wild ones to any kind of tame animals. He says: "I've known some pretty reckless animal trainers, but I've never heard of one crazy enough to stick his head into the mouth of a lion." Besides lions have halitosis, so had that even their best friends would have to wear gasmasks.

One of the most amusing stories Clyde Beatty does in the Big Cage is to make a bear turn a complete somersault—the only trick he's kind in the world. He discovered it by accident. Beatty was in the cage one day when the bear came tearing at him, teeth bared, claws tense, and ready to kill. His onslaught was so sudden, so fierce, that Beatty did the first thing that flashed on his mind. He hauled off and smashed the bear on the nose, and as nothing else is so painful to a bear as a poke on the nose, and as Beatty's hat landed on the bear's head, the bear went over in a heap and turned a complete somersault. That was what gave Beatty the idea. And today all he has to do to make the same bear turn a complete somersault is to tap him gently on the nose with his whip.

Clyde Beatty knows his wild animals of the jungle and plain—knows them better than any other man living. Yet he says his favorite animal is the dog.

CLYDE BEATTY

Stick His Head in a Lion's Mouth—
Not Without a Gas-Mask

Clyde Beatty has one of the most dangerous jobs in the world. He looks into the jaws of death, not once, but twice a day. The life insurance companies realize that he may be ripped to pieces at any time by savage claws; so they refuse to gamble on his life. He is the only performer in the circus who can't get an insurance policy.

He told me he had sometimes thought of quitting the lion and tiger business; but he says that if he had to punch a time-clock in a factory or some similar job it would kill him. And if he's got to die, he'd rather be gored to death than bored to death.

Clyde Beatty has spent half his thrilling and exciting lifetime—fifteen years of it—under the big top. As a kid back in Chillicothe, Ohio, he was crazy about the circus.

One exciting day the Barnum and Bailey circus came to town. A lion trainer hauled up a poster in his window. A glamorous picture in yellow and purple showed a lion with his whip over a cage of roaring, snarling cats. He said to the laundryman that day, "I'll give it to you if you'll run errands for me for a week." He agreed to this.

This twelve-year-old kid already had some roaring, snarling, snarling friends of his own. Or so he made believe they were. He had five dogs which he had trained to sit up and beg, roll over and walk around on their hind legs. And every so often he would stick up his circus poster and put on a wild animal for the kids in the neighborhood.

Then one summer when the big circus showed up in town, Clyde

Beatty was aboard, his heart palpitating with excitement. For three days, his desperate parents, searched frantically. His mother spent nights of weeping before a letter came saying he had a job of cleaning out the cages with the circus. He was only fifteen and he was getting five dollars and a chance to live in Paradise.

In the ten years' past, this youngster from Chillicothe, Ohio had outstripped every lion-tamer in history. He put on an act as daring, so foolhardy that even circus men said it couldn't be done. And then when they saw him actually do it, they said he was a lunatic and that his life wasn't worth a plugged nickel. He put forty snarling, spitting lions and tigers into the same cage, cracked his whip and made them do their stuff. Forty lions and tigers braving with hate and snarling with rage. No wonder the act created a sensation even among circus people, for lions and tigers are mortal enemies—they fight on sight. And more than on one occasion Beatty found himself in a cage of fighting, roaring, murderous jungle cats.

Yet strangely enough, Clyde Beatty says that lions and tigers are not the most dangerous animals to control. He's tried them all—lions and tigers, leopards, bears, hyenas, and elephants. And he found that the most dangerous beast of all is the polar bear. And he says that the hardest trick of all is to make a tiger ride on an elephant's back. Because he had been to the tiger's cage and the elephant caught the hated scent of the tiger.

You've heard, haven't you, that animal trainers control their animals by looking them straight in the eye? Clyde Beatty told me that that is a lot of nonsense. The average lion wouldn't give two hoots even if Mac West looked him in the eye.

PUBLISHED EVERY WEDNESDAY MORNING
at the Star Building, Main Street, Wainwright, Alberta.

Subscriptions
To subscribers in the 40-cent rate zone \$2.00 per year; other post office points, Canada \$2.50 per year; United States, England and Foreign Countries \$3.00 per year. All strictly in advance.

Advertising Rates
Contract rates supplied on application. Classified, straight, etc., not exceeding 25 words, 50c for first insertion; three insertions for \$1.00; strictly payable in advance.

Legal and Municipal Advertising
125c per line for first insertion and 10c per line for each subsequent insertion.

Transient advertising—Cash with order.

All changes for contract advertising will be inserted till forth and charged accordingly.

Accounts rendered monthly.

WEDNESDAY, JULY 7th, 1937

THE BURDEN MUST BE EASED

The weather is a day-to-day affair and consequently predictions concerning crops are uncertain at the best, says an exchange.

It is obvious, however, that Alberta will not have a big crop this year and there is a danger that it will again be seriously small. Absence of early spring rains made a further scarcity an added peril. Even with abundant rains from now on there will be no surplus of stock feed.

All this means that Alberta will not have prosperous and happy conditions in the year ahead. Another burden has been added to the heavy load this province has carried for seven long years. It should not be forgotten that seven years is a tenth of a human's life span, as laid down by the psalmist.

Alberta is a young province. Agriculture is only about 30 years old, which is quite youthful compared to the history of cultivation of land and the rearing of crops. We are going through a most trying period right now, but things will work out some way in the end. The most important "what is to be done now?" The situation should be very carefully considered and no snap judgment reached concerning the value or otherwise of unfortunate sections of the province.

Over the years ahead, plans and methods will be developed whereby most of the arable land now in cultivation will be farmed advantageously and economically. No large area of the province will be completely depopulated. Provision will be made for exceptional years and exceptional periods. The province must have fair treatment and kindly consideration. Our people have suffered very severely and are not in temper where they can be harshly treated or dictated to.

SOMEBODY HAS SLIPPED ONE OVER

The Vegreville Observer is not at all surprised to note in weekly exchanges that in most parts of the province there exists considerable opposition to the large school units, or divisions, as outlined by the Department of Education. On one hand there is opposition to the whole scheme, it being thought, mistakenly, that through the establishment of these divisions, the people will lose control of their schools. And, on the other hand, the divisions themselves as to boundaries, etc., are the objects of considerable criticism.

As to the latter objection, it has some validity, but it has to be borne in mind that no matter how divisions may be outlined, the objection would still remain, although it would come from different localities.

As to the former objection, that people will lose control of their schools, it might surprise most people to know just how little control they exercise anyway. The process of depriving the people of control of their schools has been going on for many years and its pace has been accelerated recently. Today, not even city or town boards of trustees are free agents in any respect for they are under exactly the same laws and regulations as the rural boards.

Since we call for compulsory education, this compulsion has been applied all round, even to school boards, and the divisional school boards will be under the same compulsion. The only "democratic" feature remaining is that the trustees are and will continue to be elected by the ratepayers—and much good may it do them.

No doubt many of the rural ratepayers feel that something has been slipped over on them. So it has. But the slipping over has been done by the members they elected to the legislature.

Mr. and Mrs. J. Welch made the motor trip to the city and return on Sunday. Quite a drive, Joe!

Quite a number of our townsmen journeyed to Sedgewick to take in the big "Stockman's" day there on the first.

Australia does not permit exportation of the curious koola, or "teddy bear" either alive or as fur.

June and July are the best times to do your painting as the buildings are dry. Good house paint at the Atlas yard from \$2.50 per gallon up. Joe Welch will advise you.

Having spent his annual holiday with his parents here, Mr. F. Wilkins returned to his employment at the coast on Thursday morning's train.

Japan's tallest man, Kin-ju-Kin, is a Korean priest, measures seven feet nine inches and is 32 years old.

Mr. and Mrs. Fred Pawling and family arrived in town on Tuesday from their home in Winnipeg, Man. They will holiday with Fred's mother, Mrs. J. Pawling, for a couple of weeks. They report a pleasant but hot trip west.

Miss Beate Welch who is taking a post graduate course at the university and Miss Grace Welch who is marking exam papers, both left for Lethbridge on Sunday.

The spinning and weaving of cotton is one of the largest of manufacturing industries in Portugal.

Bill Scutchen and his crew are going strong in the erection of the new big derrick across the river.

Johann Sebastian Bach's blindness was brought on by eye strain.

Mr. Nordstrom, who has been grain buyer at Pabayan for the past few years has been transferred to a point north of Edmonton.

For the past twenty years Mr. Johnson has been associated with the developments in the aeronautical field. During Boeing Airplane Company at Seattle during the period of the war, he served as superintendent of production of that company, becoming later vice-president and general manager and then president of the Boeing Company and of the Boeing Air Transportation Corporation, which later became the United Aircraft and Transport Corporation with its various operating subsidiaries. He served as president of Pacific Air Transport, Varney Air Lines Inc., and National Air Transport.

Mr. Johnson will begin his work in Canada next month by making an examination of all airports facilities, airports, landing fields, radio range system, lighting, etc., over the whole route from Montreal to Vancouver and from Lethbridge to Edmonton.

CARD OF THANKS

We wish in this way to offer our sincerest thanks to all for the love and sympathy which has been extended to us in our recent and bereavement by the death of the late Mr. Trefry.

THE TREFRY FAMILY.

people after the coronation (even before His Majesty had left the ancient and historic edifice) was to express their loyalty to his person and the great empire he rules over.

"Today is the first Dominion Day since the Coronation, and I think it would be well on such an occasion to express our loyalty also upon our first opportunity to gather together since that eventful day."

"All over our Dominion today, people are gathered to celebrate the anniversary of the day when Canada first became a Dominion and obtained the right to govern herself. We must not think that this action is placed in us a confidence to feel and know that we have progressed from the time when this country was, even in the East, a barbarous unsettled domain, to the present epoch in our history when we are taking our place among the nations of the world and have been voted with the rest of government."

"I say that Confederation and the granting Dominion status to Canada cemented us into closer relationship with the empire, because it has placed in us a confidence to feel and know that we have progressed from the time when this country was, even in the East, a barbarous unsettled domain, to the present epoch in our history when we are taking our place among the nations of the world and have been voted with the rest of government."

country was becoming settled; a new nation was coming into being.

However, it is 400 years from the days of Cartier to the present, and it is wonderful to look back on those years and note the changes that have taken place and the part that Canada has played in the history of the world. She is still a new country. There is still room for more progress and development, especially in our own West, yet the eyes of the world look upon her as a great nation; she takes an active part in Empire conferences and at though she is one of the youngest of the Dominions, she is one of the most powerful and most respected. We cannot but feel happy and proud when we celebrate this Dominion Day—our own national holiday."

The crowd having freely expressed their pleasure and appreciation on these splendid talks (each of which was broadcast over the public address system) all and sundry dispersed to enjoy the ball games with three diamonds going full blast the whole day, or to refresh the inner man at the well-appointed booths. The youngsters made merry with rides and so forth, too, until the deepening twilight saw them sleepily admitting it was "time to get home!" and all were expressing the opinion that it was a wonderful day.

AND THE BIG BAND

At intervals throughout the whole day, Bandmaster Alderman and his Merry Men enlivened the grounds with their sweet musical efforts, and Mr. F. Wright interspersed with other numbers over the "P.A." system—which was constantly in use, also, making announcements of events to come or giving the latest scores from the ball diamonds as games progressed.

POLICE BLOODHOUND TRANSFERRED TO NORTH

Dale of Cawmill, famed Alton shepherd dog that has aided Royal Canadian Mounted Police in hunts for lost persons and criminals, has been transferred to the Edmonton subdivision of the R.C.M.P., and will be stationed at Westlock, about 60

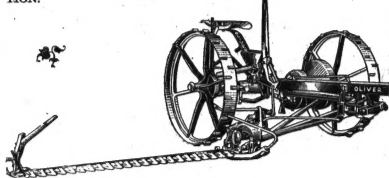

miles northwest of Edmonton. Police said they believed Dale would be more useful in the bush country around Westlock than in the more settled area near Calgary. Constable J. D. Thurston, trainer and constant companion of the keen-nosed and intelligent dog, will be attached to Edmonton subdivision as a result of the transfer.

The New "Oliver Clipcut" MOWER

IS THE FIRST IMPROVEMENT IN MOWERS DURING THE LAST 75 YEARS.

FASTER CUTTING, LESS WEIGHT ON HORSES' NECKS, LESS SIDE DRAFT, LESS CLOSING BEHIND AXLE, AND ALL GEARS RUNNING IN OIL BATH. WE USE MORE GUARDS AND MORE KNIVES ON SICKLE BAR—RESULT: EASIER AND FASTER CUTTING.

THIS IS THE MOWER THE GROWER OF HAY CROPS HAS BEEN WAITING FOR. GET OUR PRICES AND ASK FOR DEMONSTRATION.

VISIT EDMONTON FAIR WEEK

AMONG THE OLD-TIMERS

"REMINISCENCES OF OTHER DAYS"

TWENTY YEARS AGO

Mr. Ed. Mills had a large crew from town building an eight-roomed house for Mr. D. Rajotte of Green-shield.

The Great War Veterans association moved to their new quarters in the offices recently vacated by Mr. H. V. Fickhouse. Part of the building is being fitted up as a reading, writing and recreation room.

Mr. W. Gilbert is hauling lumber to build a modern home on his farm near the Rosedale school, north of Heath.

Miss Marie Mabey returned home from the States last week where she has been visiting relatives.

Mr. Trace, conductor on the G.T.P. who has resided in town for a number of years, moved with his family to Edmonton at the week-end.

Mr. S. R. Bowerman has had a large sign painted on the side of his hardware store.

Carpenters from Wainwright have been busy during the past month building large barns for Messrs. Sam Youste of Oranodale and John Ross of Gilt Edge.

HEATH

It's truly enjoyable by the sea waves!

The Spornitz family pitched their tent at Clear lake this week and expect to spend the summer there.

St. Patrick's W.A. held a very successful garden party at Clear lake on Friday evening. Various tables were grouped under the trees and a number of people enjoyed the attractions offered. Mrs. Love was the winner of the box of candy and Bob Smith won the cake in the weight guessing contest.

Mrs. Watson and her son Arthur and Mrs. Scott and Miss Margaret Bartlett of Arliland, Sask., spent Sunday visiting former neighbors in this district.

Heath Mission church are holding their annual Bazaar convention this week and a large crowd of visitors are planning to attend. A number of excellent speakers are booked for the various meetings and the Stevenson sisters will be present to give vocal selections.

Mrs. Stan Davis is home from Provo to attend the convention.

Miss Mary Aitkens returned to Camrose on Friday with her parents, after visiting in the district.

SYDENHAM

Mr. and Mrs. J. Ruste were guests at the home of the Misses Merrick on Sunday.

The Troopers from this district left for camp on Wednesday.

The school closed on Wednesday. Miss M. Sinclair returning to her home in Killam. The Sydenham school will be in charge of Miss Sinclair for another year.

Mr. Ed Goddard and Mrs. Ted Goddard were visitors on Tuesday at the home of Mr. and Mrs. F. Seabrook.

The men are still busy on their road work. The road north of town is now put in very good shape.

Rain is needed badly in this district. The hot, dry winds of the past week are scorching up the crops and gardens.

Sympathy is expressed to Mr. P. Brassard and family in the sad loss of his sister Mary Paul, who died last week in the East.

GREENSHIELDS

Mr. and Mrs. T. Daniels and family motored to Edmonton for the week-end and Miss Doris Daniels remained to attend summer school.

Mr. and Mrs. George Reynolds and Mr. and Mrs. A. Mills of McLaughlin spent Saturday and Sunday visiting Mr. and Mrs. Walter Jackson and Mr. and Mrs. L. Carl.

Those attending the camp at Sarcee from this district are R. Rajotte, R. Morrison, D. Jackson, P. McIntee, B. Haywood, F. Atwell, T. Ware.

Several people from the district attended the Czar stampede on Friday, July 2nd.

Remember the Ladies' Aid basket picnic on July 14 at Hutchison's lake. Everybody welcome.

We hear that Mr. Lloyd Haynes is planning a holiday trip to the coast.

Mr. and Mrs. Bennett and son Earl who have been at Mr. and Mrs. E. Harrington's, returned to Hardisty on Wednesday last.

TEN YEARS AGO

Canada's and Wainwright's birthday was sittingly celebrated on July 1st, with an exceptionally large crowd in attendance. At high noon tribute was paid to the war heroes by the members of the B.E.S.L. The parade was the finest to date and stretched for over a mile. The Town Band kept the audience well supplied with music and the grand stand proved an outstanding attraction. In the evening a smorgasbord fireworks display was exhibited giving a fitting closing to a successful day.

Mr. Godfrey Morris was injured while at work at the oil well.

A heavy hail storm visited the Wainwright district on Saturday doing considerable damage to the crops and gardens. It seemed to strike heaviest along the river and Mr. Norman King reported heavy loss.

Mrs. H. Wallace left last week with her two sons to spend a holiday at the Coast.

Mrs. S. R. Bowerman left for an extended holiday to be spent with relatives in Toronto.

Installation of the officers of Adeline Rebekah lodge took place at the regular meeting last week, with Mrs. Billing being elected to fill the N.G.'s chair.

Mrs. E. Ganderton left on a trip to spend a holiday with friends and relatives in B.C.

MAYFIELD

Mrs. P. Pfennig of Gadsby, is visiting her daughters in this district.

A number from our district took in the July 1st celebration and report a good time.

Miss Beulah Armstrong entertained a number of her friends at the occasion of her tenth birthday on July 3rd.

The continued drought is survey drying up the wheat fields which are prematurely ripening.

PLACE NEW SIGNS

ON ALBERTA ROADS

Welcomed by tourists, new signs are to be placed on the Edmonton-Calgary main highway, and the section of the Trans-Canada highway between Calgary and Banff.

The provincial government will supply and erect the signs according to an assurance which Hon. W. A. Fallow, Minister of Public Works has given to officials of the Alberta Motor Association.

The A.M.A. on its part is to select the suitable locations for these directional signs. Calgary branch will be responsible for the section north to Red Deer and to Banff, with the Edmonton branch looking after the section from the capital south to Red Deer.

Owing to the increasing traffic on the Banff road, it is also proposed that suitable "stop" signs should be placed on roads leading into the Banff road at points where there is lack of clear visibility.

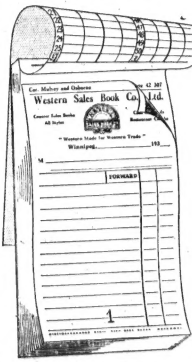

Steady increase in tourist traffic expected as roads are hand surfaced makes it all the more essential to have the main roads properly marked, in the opinion of traffic officials.

In the South Seas, money is made of porpoise teeth.

The Legion Notice Board

We quote hereunder the tentative program of the second annual rally of Alberta Legionnaires sponsored by the Edmonton branch and held in conjunction with the Edmonton Exhibition.

Special train and bus fares are in effect on all lines and reduced rates have been secured for admission to the exhibition grounds. The Edmonton branch is making no charge for this event, but is putting the facilities at the disposal of all returned men in an endeavour to foster the true spirit of legionism throughout the province.

Friday, July 16th

10:00 a.m.—Registration.
12:00 noon—Parade. March past centroph, deposit wreath and review by Lieut.-Gov. the Hon. Capt. J. C. Bowen. Dress: Legion hats and medals.

2:00 p.m. to 10:00 p.m.—Exhibition grounds: Races, etc. Special grandstand performance and fireworks display.

9:00 p.m.—Grand wrestling display in Memorial hall.

Saturday, July 17th
Morning—Out-look in Memorial hall. Picture shows for women and children; shopping tour.
Afternoon—Individual arrangements.
Evening—Dance and bingo in memorial hall.

Sunday, July 18th
Church Parade in conjunction with 49th Battalion; Parliament Building grounds. Dress: Legion hats and medals.

LOCAL NOTES

Miss Audrey Greer is the guest of Mrs. P. Rickard for this week.

Mrs. G. Christopherson, who was away to the city for a couple of weeks has now returned home.

Inaugurating the first mail flight from Edmonton to the arctic, a huge plane left the city airport on Monday morning last, and delivered postal matter in Whitehorse, Y.T. the same evening—just a little jaunt of around 1,500 miles! Many heard the send-off by means of the radio.

Sunday last saw Mr. and Mrs. D. Rajotte celebrate the 47th anniversary of their marriage, when a pleasant time was spent at the Peras cottage a Clear lake.

*** We have a big gang now unloading a big shipment of lumber from our sawmills in Alberta and B.C. Let us figure on that building or repairing you are planning. We can save you money. Joe Welch.

Mr. J. W. Fraser has a big gang of men at work over at Lloydminster where they are installing over a quarter-mile of new asphalt sidewalks (Wainwright product too) Another contract at Manville has also been awarded to Mr. Fraser.

Mrs. Pete Pfennig and Mr. and Mrs. Herman Pfennig were in town last week from Gadsby, visiting at the home of Mrs. F. Birtles.

Nearly twenty young men of our district left last Thursday for their annual military training at the camp at Sarcee camp near Calgary.

Mrs. Henry Ward was a visitor to the city for a couple of days during the past week.

Nikolas Noleuse, a departmental silk manager at Oxtone, a big London silk emporium, is discovered by Phyllis Varley, first assistant in the Chinese Silk Department, lying dead, his body wrapped in a roll of Chinese silk beneath her counter.

Superintendent James Beck, of Scotland Yard, finds that Noleuse has been strangled and later discovers that the man has been particularly interested in Suchow silk.

Professor Karmen, at the British Museum, tells Beck that he had met the man in China, where he found him inquiring the whereabouts of Two Li, a silk weaver of Suchow. The Professor tells the Superintendent that it is believed that Two Li has been tortured and since died because he knew the secret of the whereabouts of "The Five Eyes of Medichun," a jewel which has been pilaged from a temple in the mountains and which is sought by members of the Tong, a Chinese secret society. Beck forms the opinion that the weaver committed the secret to the silk he was weaving at the time he became aware that the Tong were on his heels.

Beck goes out that night to dine with Peter Oxtone, managing director of the silk store, and after he has left Oxtone receives a visit from a Tartar who threatens evil to his daughter unless he instructs the police to cease their vigil at the store.

(Now Read On)

Ling Foo came on apparently oblivious to the fact that Philip was waiting for him round the angle of the staircase. Just as he turned the corner something smashed between his eyes with the force of a sledgehammer. Ling Foo gave a sharp staccato cry, and such was the force behind Philip's blow that Ling Foo was flung backwards, his unconscious body out of control down the wide flight of stairs leading to the wide hall.

Philip waited below a door opened and he heard an exclamation that sounded oddly familiar.

It was Beck. Before Sen Yat Soh could offer any explanation for the curious noise they had heard, the Superintendent had raced for the door, flung it open and found himself confronted with the huddled heap of the Chinaman, who had admitted them to the house, lying at the foot of the staircase. To Beck's casual glance it appeared almost certain that the man's neck had been broken.

The next moment another figure stumbled rather than ran down the stairs. It was Philip Slater.

"Mr. Beck," he cried. "Thank God you've come—Phyllis—she's upstairs—that friend—"

"Steady, young man, steady," cautioned Beck kindly, as Philip swayed against him.

But it was little use counselling Philip to be steady. He had fainted. It was Inspector Graves who gave the three warning blasts on the

whistle and then rushed back into the room they had just left.

The Chinaman had vanished.

Superintendent Morroving appeared at the door.

"Quick," shouted Graves, "throw a cordon around the house and hold every Chinaman you can find."

CHAPTER XXVI

Two days later Superintendent Beck sat in his room at The Yard humming a gay tune. He had just returned home from a conference with the Assistant Commissioner and that gentleman had expressed regret that he had ever doubted the Superintendent's word. He appreciated, now that he had read Beck's final report on the case, the killing of Nikolas Noleuse had been no ordinary killing; appreciated too, that the Superintendent's seemingly fantastic theory had been moderately right after all, which just goes to show, as he had told his subordinate officer, that crime detection follows no hard and fast rule after all.

Of course, as he had explained to Beck, there was some claiming up to be done. Sen Yat Soh had been captured by the Tombridge police when they had thrown a cordon around the house and he had willingly admitted that his search for the Suchow silk had been directed towards discovering the secret of the Five Eyes of Medichun. His regret that he had been unsuccessful was tempered somewhat by the knowledge that, so far, no one else had discovered it either. He had proved, too, that he himself, while the main spring behind the Tong organization, had had no hand in the murder of Noleuse. He had confessed that the girl had been unsuccessful in her attempt to discover the secret of the Five Eyes of Medichun.

Beck looked around the assembled company and smiled. "We're one short at the moment," said Peter Oxtone. "I've asked Miss Lennard to come along, too. Miss Varley felt sure she would be interested."

and Philip Slater were both safe and that the hunt by Scotland Yard was now over, he had been curious to know the details. To that end he had invited Beck, with the permission of the Assistant Commissioner, to meet everyone interested in the case at his office at nine o'clock that night. He had willingly agreed to his two employees who had both played a conspicuous part in the affair, being granted two weeks leave of absence, but he had also asked to Beck that, in all fairness, he would like them to be present.

That night when Superintendent Beck and Inspector Graves arrived at Oxtone's, the store did not wear a look as it had done previously. Lights were burning here and there and Peter Oxtone's private office was a gay look. A number of comfortable easy chairs had been moved in, and there was hot coffee, whiskey, and even bottled beer for those who preferred it as accompaniments to the varied plates or county sandwiches.

Beck looked in addition to Oxtone, Phyllis Varley and Slater that Professor Karmen and his friend Professor Kan Fu were also invited.

Phyllis and Philip looked little the worse for their nerve-racking experience at the hands of the Chinaman. In fact, Beck noted, that the girl had a pleasant flush on both cheeks.

Beck looked around the assembled company and smiled. "We're one short at the moment," said Peter Oxtone. "I've asked Miss Lennard to come along, too. Miss Varley felt sure she would be interested."

"Of course she will," conceded the Superintendent. "She's a very plucky woman."

"From what she told me," added Inspector Graves blushing for probably the first time in his life. "I must most certainly have been through it. I admire that woman."

Beck looked across at his colleague sharply and deliberately winked at Peter Oxtone. "Miss Lennard came bustling in, shepherded by the doorman who was on duty."

"I'm sorry I'm late," she smiled. "You will forgive me, won't you?" she added, turning her smiling face on the Inspector.

"Of course we will, Miss Lennard," Peter Oxtone told her. "I must, perhaps, the Superintendent will tell his story. I'm sure we're all rather in the dark about this unfortunate affair."

They listened long and intently to the Superintendent, who refreshed his memory repeatedly from the sheet of official notes he had brought along with him.

When he had finished there was a moment of silence. Suddenly Phyllis turned to Peter Oxtone.

"I've just thought of something," she announced. "I wonder if Mr. Oxtone would excuse me for a moment while I go down to the store."

"Of course," agreed Oxtone, perplexed.

Phyllis hurried from the room and returned a few minutes later with a small brown-paper parcel. Her face was flushed and her eyes were bright.

"I want to explain," she said, as she unwrapped her package. "And I hope Mr. Oxtone will forgive me. Four days ago when the last consignment of Suchow silk came in I was attracted by one of the rolls. I liked the color and I wanted some for myself. I am perfectly aware that it is a rule of the firm that any

employee wanting to purchase anything for her own use must obtain permission from her immediate superior, but that is usually after the store has closed to the public. In this case I'm afraid I did a dreadful thing. I was afraid that if I waited there was just a chance that all the silk on that particular roll would have been sold. So in a sleek moment I cut myself a length from it. It was just then that I encountered the Chinaman standing at my counter. I was so shocked—knowing my guilt, that I bundled it in a piece of paper and stuffed it at the back of the shelf under the counter, intending to see the manager about it later. Unfortunately, as you all know, events jumbled over themselves so fast that I quite slipped my memory and it's only since hearing Mr. Beck that I thought...

Professor Kan Fu leaned forward eagerly in his chair. "May I see that piece, Miss Varley?"

The girl unfolded the remainder of the wrapping and handed him a dress-length of Suchow silk.

The Chinese professor almost snatched it from her in his eagerness and, taking a magnifying glass from his pocket, ran the silk rapidly along one edge. Suddenly they saw the glass halt in its journey. They saw, too, the professor's body stiffen. Then he looked up, and when he spoke there was a tremor in his voice.

"Thank you, Miss Varley," he said, simply. "It is here. If you had not cut off this length we should never have found it because the remainder of this roll was stolen by our rivals."

Professor Karmen eager as a delighted child took the silk and the lens from his contemporary's hand.

"He's right. Here it is. It looks like an ordinary trade-mark but it isn't. The Chinese characters are woven so minutely that they can only be deciphered by the aid of this powerful lens. I, too, thank you Miss Varley. It is the working of a bountiful Providence!"

A murmur of satisfaction rippled through the company. "I don't think Miss Varley need have fear of any consequences," laughed Peter Oxtone. "As you say, Professor, Providence moves mysteriously."

Miss Lennard's eyes were bright. "And will you really be able to restore lost youth?" she asked.

Professor Kan Fu smiled across at her. "It is a story in my mythology, dear lady," he told her. "It has never been tested. Some day, perhaps, we may be tempted to do so, but for the present... Youth is often a desirable estate," he went on, "but for myself I think there is something equally gratifying and fascinating about age, about that leaven of maturity that only age can bring to us."

Miss Lennard nodded in agreement and looked up at Inspector Graves.

"Well," said Beck, "that's what I call fine. If you'll give me a few lines of a report on this, Professor, I'll pop in and explain it to the Assistant Commissioner first thing in the morning."

"I think this is an occasion for a toast," announced Peter Oxtone. "I'm sure the Superintendent's thirsty, too."

When the glasses had been filled and Oxtone insisted that coffee was quite unsuited to the moment—he gave the toast:

"To Miss Varley, whose disobedience to rule has solved a problem for Scotland Yard."

Phyllis felt herself blushing as the company clinked glasses.

"And now one for Superintendent Beck—the man who refused to be shaken off the scent."

More toasts were drunk and the happy little party did not break up until close upon midnight.

"Coming along Inspector?" asked Beck touching his colleague's sleeve. "If you don't mind, sir, I think I'd better see Miss Lennard home to Bateman's."

Miss Lennard blushed because the Inspector had not been able to conceal his own blushes.

THE END.

— G. WHIZ JUNIOR — By Bill Holman —

ATTRACTIVE MEXICAN DISHES

The Senoras and Senoritas across our southern border, where it is taken for granted that every married and marriageable woman has been trained to be a good cook, have learned how to prepare some of the most appetizing foods imaginable. Here are two delicious dishes that should be tried by women in the north:

Chicken Senora
Cut a frying-size chicken in quarters and fry in olive oil with 1/4 cup finely chopped onion and raw white potatoes cut in dice. Cook until the meat of the chicken is white. Add 1/4 teaspoon sugar, 1/4 teaspoon chopped parsley, 1 tablespoon chopped green pepper and 1/4 cup hot water. Season with salt and pepper to taste and cook very gently until the chicken and potatoes are thoroughly done.

Citric-acid
1 tender summer squash
1 tablespoon butter
1/4 cup water
1/4 cup sugar
1/4 cup vinegar

1. The squash and cut into cubes. Fry until tender in the butter stirring frequently. Add the seasonings and the sweet corn cut from the cob. Have about a quarter as much corn as squash. Continue cooking until the corn is soft.

HOUSEHOLD USE FOR LEMONS
To Replace Vinegar: Lemon juice may be substituted for vinegar in any recipe that calls for the latter, except pickling.

To Sour Milk: Lemon juice added to sweet milk will sour it suitably for cooking.

For Stewed Dried Fruits: Add a small amount of lemon juice and grated lemon rind in stewing such dried fruits as prunes, figs, peaches and so on.

In Cooking Meats: Tough meats will be made tender by adding a teaspoon of lemon juice to water in which they are boiled.

HINTS ABOUT SHRIMPS
Do you have a few glass jars of shrimps on your emergency shelves. You should for this tasty sea food lends itself to many very delicious "company" dishes. Through the clear glass of lemon juice can see that your shrimps are in good condition. That's why I advocate stocking the emergency shelves with bottles and jars made of glass. Try these recipes this month:

Shrimp a la Newburg
1 pint shrimp meat
2 yolks of eggs
1 cup cream
1 cup milk
2 tablespoons flour
4 tablespoons butter
1 teaspoon anchovy essence
1 teaspoon lemon juice
Salt and paprika

Melt two tablespoons butter and cook the shrimps in it, adding the seasonings. Scald the milk, melt the rest of the butter, add the flour, stir and cook together; add the hot milk, beat until smooth, then add the cream. When it reaches the boiling

point, draw aside and add the yolks of the eggs stirring as it thickens without allowing it to reach the boiling point again or it may curdle. Add the shrimps, blend all together, taste to see if seasoning is right and serve on toast or in ramekins, with toasted crackers.

Creamed Shrimp
1 cup shrimps cut up
1/2 cup milk
1/2 cup cream (or canned milk, undiluted)
3 tablespoons butter
4 tablespoons flour
1 teaspoon Worcestershire sauce
1/2 cup grated cheese
Salt and paprika

Heat the shrimps in half a cup of boiling water. Scald the milk, melt the butter, add the flour, stir and cook together; then add the hot milk all at once and beat vigorously until it has become very smooth. Add the seasonings and the cheese, stirring until well blended in, then add the cream and the shrimps. May be served on slices of dry, cold toast which have been quickly dipped in and out of boiling water, then buttered. Or serve in ramekins with thin slices of toast or toasted crackers.

Pork Chops in Dixie Style
4 pork chops
2 tablespoons flour
2 tablespoons lard
1 tablespoon chopped green pepper
1/2 cup cream
1/2 cup corn
1/2 cup rich cream sauce
Salt and pepper

Dredge pork chops with flour, and brown on both sides in hot lard. Transfer to a baking dish. Brown the corn, green pepper, and pimiento together in the pan in which chops were browned. Mix with cream sauce and pour over chops. Bake in a moderate oven (350 degrees F.) until the chops are done thirty to forty-five minutes.

OUR FRIEND THE BOTTLE
When company comes you want to be sure of the food you serve. Fortunately almost any food may now be purchased in containers of glass. These sparkling, transparent containers, enable you to view your catsup, honey, tomato juice, string beans—and dozens of other foods—see that your shrimps are in good condition. That's why I advocate stocking the emergency shelves with bottles and jars made of glass. Try these recipes this month:

Sauerkraut-Tomato Cocktail
Equal parts sauerkraut and tomato juice or one part sauerkraut and two tomato; add a few drops of tobacco or horseradish sauce. Chill thoroughly.

Ginger Ale Salad
Soak two tablespoons of gelatin in two tablespoons water for five minutes. Add to gelatin:

1/2 cup hot water
1 cup ginger ale
1/4 cup lemon juice
2 tablespoons sugar
Cool this mixture, then add:

Hints for the Household

Conducted By Betty Barclay

1. 4 tablespoons crushed pineapple
1 cup diced celery
1/4 teaspoon salt
Four into mold and chill. Serve on crisp lettuce.

THERE'S NO SAFETY IN NUMBERS OF FLIES!

The number of flies that can trace their origin to one single female house-fly during the season runs into the millions.

When you consider that each single one of this host is an individual carrier of the worst sort of filth, it must be obvious how important it is to combat this menace. Flies delight in feeding on uncovered garbage, refuse, rotting animal and vegetable matter, horse manure, in fact, everything that is particularly obnoxious to us humans.

Think what may happen if one of the loathsome pests gets into a home and is left unmolested. The baby's bottle, even the sleeping baby's lips, and any food or drink left, are choice spots on which he will settle, leaving disease and even death in his wake.

What are we to do to fight this menace? Remove or protect all the breeding grounds we have mentioned and any others that may prove breeding grounds for flies, and keep doors and windows protected with adequate screens. Cover all food and drink at all times. And, to make assurance doubly sure, place some fly pads around the house in every room. They attract the flies and kill them all very quickly.

WILSON'S FLY PADS REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocer or General Store.

10 CENTS PER PACKET WHY PAY MORE?

Advertisers

of Fire Extinguishers

APPEAL TO FEAR!!

but the advertisers in the Wainwright Star appeal to YOUR COMMON SENSE.

They ask you to consider the convenience of being able to get what you want when you want it.

They remind you of the friendly, personal service they offer.

They bring to your attention the saving in time, patience and mileage effected in trading in Wainwright.

They give specific instances of good values at FAIR prices.

The amount of business given local merchants and professional folk in Wainwright determines the type of service rendered.

This paper commends the people in Wainwright who have the trade at home habit. It shows good common sense. Thereby is a strong community spirit fostered. The pity is that all do not trade exclusively at home.

Some Wainwright merchants are themselves to blame, perhaps, for a good part of the trading done by Wainwright people away from home—because they do not advertise the fact that they carry as good goods at as attractive prices as their competitors in neighboring cities and towns.

This Week in Washington

Washington—It looks as if the general tax revision which Congress leaders had hoped to postpone until the next session, may be the live issue which this session of Congress will have to deal with. The President's action in calling attention to instances of tax avoidance by certain rich men, and asking for a Congressional investigation, has brought the subject of "loopholes" in the tax laws sharply to the fore. It has, indeed, taken the place which Mr. Roosevelt's Supreme Court reorganization plan has occupied for more than three months as the main topic of interest on Capitol Hill.

While the President has not receded from his belief that the Supreme Court needs new blood, it is the best opinion here that his plan will not be adopted, at least at this session. It might be possible for a compromise measure, providing for two additional judges instead of six, to get through the Senate, though that is questionable, but the opposition in the House is now regarded as strong enough to block action.

Not Evasion But Avoidance
(The whole point of the "tax loopholes" is that the revenues which were expected from the undistributed earnings tax, enacted last year, have failed to materialize, and the Treasury experts who guessed wrong about that tax are trying to find an "out" for themselves by blaming the failure of revenue upon men and corporations which have taken advantage of holes in the income tax laws to pay less than the Treasury thinks they ought to have paid.)

There is no direct assertion that anyone has done anything illegal. The unnamed individuals are not accused of tax "evasion," which is illegal, but of tax "avoidance" by methods which may be morally deplorable but which are entirely within the law. The trouble is with the tax laws, and the present effort will be to plug up the loopholes of which these individuals have taken advantage.

Men whose income is so large that the payment of taxes upon it is a serious matter, can afford to hire legal experts to show them how they can avoid payment of taxes which the ordinary citizen has to pay because it is not worth the cost to go to the trouble of avoiding them.

And one of the big problems is how to plug up loopholes through which a few rich men can crowd without inflicting hardships upon the vastly larger number of taxpayers.

MODERN WOMEN

CHARL ORMOND WILLIAMS
President of National Federation of Business and Professional Women's Clubs, Inc.

Dr. Martha M. Elliot, assistant chief of the U. S. Children's Bureau, and Miss Joanna C. Solord, director of the Charity Organization Department of the Russell Sage Foundation know more than almost any other women about the problems of public health and social relief. They have been featured on the program of the National Conference on Social Work in Indianapolis.

A fifteen-year-old girl holds a unique place in Portugal's life for she is the only equestrienne bull-fighter in the world. Concha Cintron, "Portuguese Sweetheart," as she is called, is really from Peru and she appeared in the bull-ring there at the age of thirteen.

Czechoslovakia has its first woman professor at the University of Prague, Madame Milada Fialova. There is almost complete equality between men and women in that country.

The Saratoga Springs Real Estate Board is the only realty board which has a woman president, Mrs. Bertha F. Ingham, and a woman secretary, Miss Ruth Meehan.

To New England goes the palm for electing the largest number of women legislators. In three states in that district there is a total of 61. New Hampshire has 19, Connecticut, 18 and Vermont 14.

Mrs. Margaret Campbell Goodman is believed to be the only woman deep-sea diver. She has had some interesting experiences in marine salvage and the locating of sunken treasure from an airplane.

Our first woman Representative for Congress, Miss Jeannette Rankin, who was opposed to war and had the courage to vote against America entering the World War, is now a legislative director of the National Council for the Prevention of War. Miss Rankin comes from the Rocky Mountain district.

Queen Marie of Yugoslavia is a great admirer of beautifully bound books.

For the first time in English history a Queen Mother saw her son crowned when Queen Mary attended the Coronation of King George VI.

who do not try to dodge.

To Make Names Public

One result of the sudden interest in tax-avoidance will be to bring out before a Congressional committee the names of men who are accused of taking unfair advantage of weaknesses in the tax laws. Gossip around Washington is the Administration hopes particularly to show up a large motor manufacturer, several members of a very wealthy family and the heads of three important chains of daily newspapers.

It remains doubtful how far Congress will go in that direction, but it is a reasonable certainty that certain practices which the present law permits will be made illegal and that the pressure for a complete revision of the tax laws will become stronger. Tax avoidance alone would not account, experts say, for more than \$100,000,000 of the \$600,000,000 shortage in this year's estimates, if that much.

Billions-and-a-half Relief Stands
(The prospect grows stronger for the enactment at this session of a new wage-and-hours bill, which will specify in explicit terms just how many hours persons engaged in any labor affecting interstate commerce may work, and the minimum amount per hour which they must be paid. This would remove the main objection upon which the N.R.A. was declared unconstitutional, that of delegating too much law-making authority to the Executive.)

The present belief is that the wages and hours will be fixed at "forty-forty." That is, forty hours a week at not less than forty cents an hour or \$16 a week as the minimum wage. There is bound to be a stiff debate on the proposal to fix that standard, which would have to apply to Negro labor in the South as well as to white labor in the North; and that does not appeal strongly to the southern representatives in Congress.

(The "inside" story of the defeat of the attempts in Congress to replace the appropriation for relief from the billion and a half which the President requested is that W.P.A. Administrator Hopkins sent out word to many states and communities telling how various W.P.A. projects must be dropped if the appropriation were cut.)

Letters and telegrams of protest began flooding Congress, and few members wanted to take the responsibility of standing for re-election in 1938 with a record of having opposed the flow of Federal funds into their districts. The political power wielded by the Relief Administration is one of the strongest influences in Washington.

(There are 976 miles of railway in Connecticut.)

JOE GIZI

HOW DOES A WORK-OUT SHOE LACE KNOW WHEN WE'RE IN A HURRY?

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

THE BATTLE AGAINST CANCER

Special Causes of Cancer:—We know the causes of some cancers. Percival Pott, the great English surgeon, said in his book published in 1772 that he thought the cancer of the skin from which chimney-sweeps suffer was caused by the contact of soot with the skin in the course of their daily work. His opinion has proved to be correct. It was shown in 1930 that cancer of the skin may also be caused by continued contact with coal tar, shale oil, mineral lubricating oils, etc. So these cancers may be prevented by protecting the workers from prolonged contact with these and other injurious substances.

Thorough cleanliness is a great protection. Three times a day at least, say before each meal, the hands should be thoroughly washed with soap and water and in most cases the clothing worn at work should be changed, or at least aprons, gloves, smocks, overalls, etc., is an important way of secur-

ing safety for the worker and these ways must be found and followed to prevent cancers developing. Find out the cause and prevent the cancer.

X-Rays and Radium.—This is a modern miracle. There is something wrong in some organ of the body. We see a growth which looks dangerous. We must destroy it or it will destroy the patient. Perhaps the growth can be removed by a skillful surgeon. Will it come back—perhaps in two years or more? That is the question. All cases are not suitable for operation, but the use of X-Rays and Radium has now been developed and extended and improved so much that our best hope for destroying certain growths and saving the patient is often the use of Radium and X-Rays, in the hands of a skillful radiologist. This is one of the greatest gains in the war against cancer.

Co-operation.—The war against cancer is a war of co-operation. The doctors want to tell all the people the common sense about cancer. And that common sense is that cancer can nearly always be cured if the doctor gets a chance at it soon enough. Fortunately there is usually some warning that cancer is coming and there is a friend who can tell you what the warning means and interpret the handwriting on the wall for you before it is too late and that friend is your doctor.

NEWS & VIEWS OF TOWN AND DISTRICT

BORN.—To Mr. and Mrs. B. F. Beaudier, at the Wainwright municipal hospital on July 3rd, a boy.

We are glad to know that Mr. W. Young, of Clear, who had a fractured collar bone while playing ball last week was able to proceed home after receiving attention at the hospital.

Mr. and Mrs. R. Snyder left at the beginning of the week for a short holiday at Calgary and Banff.

We are informed that Mr. N. Ricker of the Wainwright mill has procured a new truck for use in his business.

Do they want The Star? Well, we'll say they do, for this week we had the pleasure of counting exactly 200 pennies for a faithful reader's renewal subscription!

We understand that J. Fralick is now employed at the Metekohn refinery north of town.

Mr. and Mrs. G. L. Hudson are down here from the city. They are camping in the Turner cottage at Clear lake.

Mr. and Mrs. Heffernan and their little family left on Sunday to take in the big stampede at Calgary. They are using their new trailer and will journey to Banff before returning.

Miss M. Steel is attending summer school in the city at variety.

Tenders are being called for extensive repairs to the public school buildings in town.

The equipment and ice-making machinery has been removed from the former Wainwright meat market, and the new owner of the premises plans to start right away to alter and equip the place for another restaurant.

Miss A. Nicholson left for her parents' home in Prince Edward Island last week. She will spend a holiday there before returning to her school duties at Ascot in the fall.

Mr. F. W. Hess, general manager of the Albia Lumber Co., was in town for a short time at the weekend.

News reached town at the weekend of the marriage of Miss Phyllis Oxley, who attended school here some years ago while her father was employed at the U.G.G. elevator.

At the time of writing, Miss Amelia Earhart, who was making a flying tour around the world, was down somewhere in the South Pacific with her \$20,000 airplane disabled. She is being sought frantically by airmen and seamen of the U.S.

Mr. H. C. Link is away for a few days visiting her parents in the city.

We extend sympathies to Mr. P. Brassard who has been bereaved by the death of his sister Marie at Jonquiere, Que. This young lady lived here with the family some time ago and will be remembered by quite a few.

We are glad to report that the little Myers girl who unfortunately fell from the swings at the fair grounds on Thursday, is now recovered from her shocks and injuries.

Miss M. Wittmann left on Monday to continue her course of studies at the university of Washington.

With head up and chest out, Mr. Pete Poltras entered the portals of the hall of fame on Sunday when he joined the "hole in one" class at the local links by a drive on the fifth hole. Congrats!

Mr. A. Sabourin is busy this week on the erection of a new house on his farm at Heath.

Mr. L. E. Ardell arrived from Killam at the weekend to assume the duties of Ray Crossweller on the ledgers at the Bank of Montreal.

Mr. and Mrs. C. E. Hudson are now occupying the Simpson cottage on Fourth avenue east, Mr. Hudson having temporary charge of the repeater station at the depot.

Misses Hope and Margaret Smith arrived last week-end to spend a short holiday with their brothers Ernie and Alec in town.

Mrs. R. Wright left on Friday to spend a holiday with friends at Pigeon lake.

Having closed school at Lavoie, Mr. and Mrs. J. Mitchell are spending their holidays with relatives in town.

GARDNER LEWIS, Gilt Edge. 7-7

Mr. O. W. Murray is away to summer school at variety, following which the family plan a short holiday before returning to again take charge of the public school in town.

Sunday evening last saw the closing of the pleasant camp which the C.G.T. girls have been conducting for a short time at King's park at Fabyan.

Miss Bond, teacher at Trafalgar school has left to spend her holidays with her parents.

Miss Irene Lismore was a tripper to the city for a day or two last week.

Little Jean Hutchinson left on Thursday to spend her holidays with her aunt at Biggar, Sask.

Among town folks who are enjoying the balmy breezes these days are to be found Mr. and Mrs. F. Thurston and their little son, as well as Mrs. Perras and Mrs. Leroux.

Miss Mirkred Perkins is over from Lloydminster to spend a few weeks with her parents on the farm for a holiday.

Don't forget to obtain that insurance on your car before leaving on your holiday trip. It will save you worrying and may be a blessing to you before you return. All kinds of coverage can be arranged by Joe Welch at very cheap premium.

Miss Coral Healey left for the coast last week-end. She plans to spend the summer with her parents there.

Mr. and Mrs. C. Sorgan are planning to move to the former Mike Stang home on Third avenue east.

Dr. and Mrs. Wallace and their two sons have now moved out to their summer cottage at Clear lake.

Mrs. L. Tondou and Miss H. French left on Monday for a trip to the coast.

We learn that Mr. R. Bryan is planning to move from his present home to occupy the suite in the Telford Block on Main street.

Miss Grace Betts was in town last week from Ponoka on a visit to friends in town.

Mr. and Mrs. G. Siddall and their sons are in residence at their lake cottage at Clear lake.

Sunday morning last saw Mr. H. P. Thorsen enroute to the city. He will mark exam. papers for a few weeks while there.

While the weather is so fine is the right time to plan to build or repair. Let me give you an estimate on the cost of your needs. It's FREE! Anyway, Joe Welch, agent.

Dr. and Mrs. Springbett are away to take in the Calgary stampede and plan to make a visit to Banff before returning home.

Quite a lot of fun was experienced by the boys of Mr. C. T. Lally's S.S. class when he entertained them at his lake cottage.

Rev. P. Rickard of St. Thomas' church is away this week representing the local diocese at the church camp at Wabamun lake.

Miss Jessie French and her brother Harry drove down from the city last week to spend a few days with their father here. They returned on Sunday last.

Miss Dora Henderson, of Rabbit Hill, is here on a visit to her sister, Mrs. G. Christopherson, for a holiday.

Don't forget your car insurance before you leave on that automobile trip you may be planning. Don't take chances; they are costly. See Joe Welch.

The sad news reached town on Thursday last of the passing of Mr. James G. Glass, after a very brief illness, at the age of 64. Mr. Geo. Glass, of the C.N. staff immediately left for the home of his late father in Toronto. Mrs. J. Pawling and Mr. W. Glass of town are his mother and sister of the deceased gentleman and sympathies are extended to the whole family.

A very pleasant time was spent by the parents and scholars of Gerald school last week when the picnic arranged by Miss Steel the teacher, proved a happy innovation.

Among the new car owners of the past week are W. Wilson, G. E. Miles and W. Anderson, all supplied by the Wainwright Motors.
